Subject: Garbage rate increases

Did Tracy go after grants to fund the organic waste program like other cities did? In 2020 Manteca was awarded \$800k for their organic waste program.

<https://www.calrecycle.ca.gov/Climate/GrantsLoans/>

Article that talks about available funding for local municipalities for organic waste due to SB1383:
<https://www.westerncity.com/article/what-cities-need-know-about-sb-1383-and-funding-organic-waste-management>

This law gave Tracy since 2014 to make changes, so waiting two months before this program changes need to be implemented before citizens and their City Council need to make a decision seems rushed and no great decisions are made this way. Please do not tell us there isn't time to look for either another waste disposal company or funding. At this point I expect you to pay the fines for not doing what a city should have done already to prepare for this change, and what our neighboring city did, and get us affordable and competitive rates for our waste disposal, as well as take the time to educate the public about how to sort their waste.

Thank you

Subject: Property at 714 N Central Ave. Tracy, CA 95376

Ladies and Gentlemen,

Regarding the planning department, city of Tracy and yourselves deciding to remove the structure located at 714 N Central Ave and replace it with a parking lot, is the most short-sighted thing I have seen in years. The owner of the property, whether in the right or not, has prepared to make all the improvements requested originally and all that have been added along the way in the cities attempt to take over this property. Not to mention that the owner is a veteran and was out of country serving this nation for a one-year deployment. Do you really want to be the council/city that kicks a veteran in the teeth like this?

I implore you to do whatever it takes to enable this sailor to complete the renovations and reopen the building as a prosperous business in one of the oldest and historic buildings in Tracy!

I pray to see/hear a correct and positive response to my request.

Regards,
David Moore

Subject: Tracy Article with Dr. Parks

Hello

Theses articles and statements from “Dr.Maggie Parks” is concerning .
There is NO test for the “Delta Variant”

So where is she getting her numbers on that. When does this end?? We don't live our lives on
guidelines and color charts. We are sovereign beings!

She has not nor has it been proven elsewhere by peer reviews that masking (covering our nose and
mouth that we breath with) works to stop a “virus.”

Where's the proof on that and testing all these different mask that people wear and OUR children??? If
one can breath through a mask, then then any virus can get in or out of it; the virus particle are that
small. Also of it was that deadly then why are there masks all over the public grounds as waste and not
in hazard bins??? Our streets are now full of masks contamination..

Also DO NOT put vaxx illegal mandates/measures on OUR CHILDREN !

Subject: SAVE THE GREAT PLATE BUILDING

This was an old union hall for the railroad workers. When did tearing down our history for parking lots become a priority? This is a travesty. Enough is enough.....

To: Tracy City Council <tracycitycouncil@cityoftracy.org>
Subject: Agenda item 3F 11/16/21

Good Morning City Council Members,

I am emailing regarding on the agenda for 11/16/21 item 3F. This item has directly impacted my neighborhood for years. The city has done nothing to help us with the peacock problem and YES it is a huge problem. They are loud, destructive, and cause issues with my pets.

First, they are extremely loud during early morning hours. So loud my neighbors have been woken up at 3:00 am dealing with the noise. Next, they are destructive! They have destroyed plants, gardens, and poop everywhere!!!! The most destructive is on our solar panels. They fly from roof to roof. Solar panels are being broken by these birds. Panels are very expensive. We have had to replace ours because of the peacocks. Last, is the danger and stress to my pets. They fly into our backyard constantly. Causing our dogs to bark and be stressed. I saw in a report not to leave water and food out. How is that fair my own dogs can't have water when it's 100 degrees out because of the peacocks.

It would be in the best interest of the city to FINALLY deal with the peacock issue. They need to be removed from our neighborhood. We have had enough!!

Subject: Peacocks

Dear City Council members, I wish to weigh in on the proposal to move the peacocks out of our neighborhood at Redbridge to a new location. Although they are pretty to look at, they are extremely disruptive every day.

They wake me early by marching across my metal roof which sounds each day like an intruder coming onto the property.

Some mornings the noise can be shocking and upsets my peace and quiet. Some mornings I can't get my blood pressure down from the racket they cause.

The birds climb over the overhang over the driveway and poop all over our cars and we can't keep them clean, especially with the water restrictions we are in, not to mention the deterioration of the paint and destroying the value of our cars in the driveway.

Please consider relocating these pests as they are a major nuisance to our every day living!

Thank you.

Jane Shiu
