Subject: A request for bleachers/canopy

Hello Tracy Parks & Rec.

It has been almost 20 years that we have been playing cricket at the Plasencia fields. In 20 years, we have never asked the city for anything, except for replacement of carpet last year due to financial difficulties as a result of Covid-19.

As other sports facilities continued to get upgrades over the years, hardly anything has been done for the cricket community in Tracy. We continue to carry heavy 150 to 200 yards cross the field just to find some shade in the hot summer days. Then, after the game we carry that equipment back another 150 to 200 yards to our cars. Lets not forget that there are no bathrooms at Plasencia Fields. We arranged for a Port-o-Potty. For that, you have to walk another 150 - 200 yards.

We are making a humble request to have at least one bleacher with canopy installed near the loading ramp on the of Plasencia Fields. This will not only provide shade during the hot summer days, it will also allow us to unload, load, and vacate the field immediately after the game. There is plenty of space available to place the bleachers. I am sure the city has one or two at their maintenance facility or they can be relocated from other less used facilities.

Please open the attached photos to view the proposed site. It is out of field of play for soccer and cricket. I have also attached sample photos of the type of bleachers we are requesting for and we are open to any suggestions. The season just started and we have a long summer to go. I hope we can get one in the near future. Thank you.
