See end of permit for code descriptions.

I understand that this permit does not relieve me from liability for any damages to any persons or property caused by the use of these pesticides. I waive any claims of liability for damages against the County Department of Agriculture based on the issuance of this permit. I further understand that this permit may be revoked when pesticides are used in conflict with the manufacturer's labeling or in violation of applicable laws, regulations and specific conditions of this permit. I authorize inspection at all reasonable times and whenever an emergency exists by the Department of Pesticide Regulation or the County Department of Agriculture of all areas treated or to be treated, storage facilities for pesticides or emptied containers and equipment used or to be used in the treatment. I have considered alternatives and mitigation measures pursuant to Title 3, California Code of Regulations, section 6426. Taking into account economic, environmental, social, and technological factors, I have adopted those that are feasible and would substantially lessen any significant adverse impact on the environment.

**GROUNDWATER PROTECTION PERMIT CONDITIONS**

These conditions apply to pesticides labeled for agricultural, outdoor industrial, or outdoor institutional use that contain chemicals listed in 3CCR section 6800(a): ATRAZINE, SIMAZINE, BROMACIL, DIURON (except products with less than 7% diuron applied to foliage), PROMETON, BENTAZON, AND NORFLURAZON. Ground Water Protection Areas (GWPA), for

Permittee: GOUVAIA, MARK

Permit Number: 39-10-3902168

A list of GWPAs may be obtained from the Commissioner's Office or DPR's website ([www.cdpr.ca.gov/docs/gwp](http://www.cdpr.ca.gov/docs/gwp)).

"Engineered rights of way" are defined as areas within a ground water protection area (GWPA) that are constructed in a way that results in increased runoff and collection of storm water, such as railroad ballasts and berms, public roadsides, and highway median strips or similar areas, but not canal or ditch banks or utility lines.

**SPECIFIC GROUNDWATER PROTECTION PERMIT CONDITIONS ATTACHED**

**GWP-C & D Unlined canal and ditch banks**

- 1 - Percolation rate is less than or equal to 0.2 inches per hour
- 2 - Applied six months prior to water run
- 3 - All applications are prohibited below high water line

**GWP-ROW Engineered rights-of-way within San Joaquin County GWPAs**

- 1A - Soil disturbance within 7 days
- 1B - Incorporation
- 1C - Applied between April 1 and July 31
- 2 - Runoff passes through adjacent fully vegetated noncrop area
- 3 - Compliance with NPDES permit

**GWP-R Runoff GWPAs within San Joaquin County**

- 1 - Soil disturbance
- 2 - Incorporated
- 3 - Band treatment
- 4 - Applied between April 1 and July 31
- 5 - Runoff water held onsite
- 6 - Runoff water stored offsite
- 7 - Runoff to adjacent fallow field

**GWP-L Leaching GWPAs within San Joaquin County**

- 1 - No irrigation
- 2 - Bed or berm application
- 3 - Managed irrigation

**GWP-Director Director Approved Alternative Management Practices or Interim Use**

- 1 - Director approved alternative
- 2 - Director approved interim use

Revised 10/04

Permittee: GOUVAIA, MARK

Permit Number: 39-10-3902168

In addition to all applicable laws, regulations, label restrictions and other more restrictive conditions of this permit, THE FOLLOWING CONDITIONS APPLY TO APPLICATIONS COVERED BY THIS PERMIT.

1. Maximum wind velocities for applications of Restricted Materials unless otherwise covered by the label, law, regulation, other permit conditions or environmental conditions at the application site are:
  - a. Spray - 12 m.p.h.
  - b. Dust - 8 m.p.h.
  - c. Pellets, granular or baits - 16 m.p.h.
2. No pesticide application shall be made or continued when there is the likelihood of contaminating any persons, non-target crops, animals or other public or private property.
3. Unless specifically named as a dust on this permit, NO DUST FORMULATIONS are allowed.
4. Apply pesticides covered by SLN(s) and Section 18(s) in conformance with the SLN(s) and Section 18(s).
5. A flagger is required at the application site for all AIR applications of Zinc Phosphide bait.

Revised 10/90

Q Dicamba &amp; Phenoxy Herbicide CV

CONDITION - Q - DICAMBA AND PHENOXY HERBICIDES - CENTRAL VALLEY/HAZARDOUS AREA

In addition to all applicable laws, regulations and label restrictions, the CONDITIONS CHECKED BELOW APPLY to applications covered by this permit.

1. No ester formulation applications allowed.
2. A smoke column is required at the application site for all Phenoxy and Dicamba applications by aircraft beginning March 16 and continuing through October 15.
3. Do not discharge material more than 10 feet above the crop or target.

4. A drift reducing agent shall be added to the spray mixture at label rates

Permittee: GOUVAIA, MARK

Permit Number: 39-10-3902168

5. Maximum wind velocity for Phenoxy herbicides - 10 m.p.h.
6. Maximum wind velocity for Dicamba - 10 m.p.h. EXCEPT when wind is moving in direction of sensitive crops, the maximum wind velocity - 5 m.p.h.
7. No Dicamba application allowed in the vicinity of sensitive crops when the maximum temperature on the day of application is predicted to exceed 85 degrees fahrenheit. Predicted temperature for the following day will be determined by the 3:30 p.m. prediction by the National Weather Station - Stockton Airport.
8. Dicamba applications by aircraft are restricted to a minimum distance of two (2) miles from the following susceptible crops: beans, grapes, sunflower, tomato, safflower, curcurbits, potatoes.
9. Dicamba applications by ground are restricted to a minimum distance of 20 feet from the following susceptible crops: beans, safflower, tomato, curcurbits, potatoes and 1/4 mile from grapes and sunflowers.
10. No Dicamba or Phenoxy herbicide applications allowed beginning March 16 and continuing through October 15, and until grape leaves in the vicinity of the treated area are "browned off".

**GROUNDWATER PROTECTION PERMIT CONDITIONS**

These conditions apply to pesticides labeled for agricultural, outdoor industrial, or outdoor institutional use that contain chemicals listed in 3CCR section 6800(a): ATRAZINE, SIMAZINE, BROMACIL, DIURON (except products with less than 7% diuron applied to foliage), PROMETON, BENTAZON, AND NORFLURAZON. Ground Water Protection Areas (GWPA), for San Joaquin County, are designated in the Department of Pesticide Regulation document EH03-05.

A list of GWPAs may be obtained from the Commissioner's Office or DPR's website ([www.cdpr.ca.gov/docs/gwp](http://www.cdpr.ca.gov/docs/gwp)).

"Engineered rights of way" are defined as areas within a ground water protection area (GWPA) that are constructed in a way that results in increased runoff and collection of storm water, such as railroad ballasts and berms, public roadsides, and highway median strips or similar areas, but not canal or ditch banks or utility lines.

#### SPECIFIC GROUNDWATER PROTECTION PERMIT CONDITIONS ATTACHED

##### GWP-C & D Unlined canal and ditch banks

- 1 - Percolation rate is less than or equal to 0.2 inches per hour
- 2 - Applied six months prior to water run
- 3 - All applications are prohibited below high water line

##### GWP-ROW Engineered rights-of-way within San Joaquin County GWPAs

- 1A - Soil disturbance within 7 days
- 1B - Incorporation
- 1C - Applied between April 1 and July 31
- 2 - Runoff passes through adjacent fully vegetated noncrop area
- 3 - Compliance with NPDES permit

##### GWP-R Runoff GWPAs within San Joaquin County

- 1 - Soil disturbance
- 2 - Incorporated
- 3 - Band treatment
- 4 - Applied between April 1 and July 31
- 5 - Runoff water held onsite
- 6 - Runoff water stored offsite
- 7 - Runoff to adjacent fallow field

##### GWP-L Leaching GWPAs within San Joaquin County

- 1 - No irrigation
- 2 - Bed or berm application
- 3 - Managed irrigation

##### GWP-Director Director Approved Alternative Management Practices or Interim Use

- 1 - Director approved alternative
- 2 - Director approved interim use

Revised 10/04

P

General

CONDITION - P - General

In addition to all applicable laws, regulations, label restrictions and other more restrictive conditions of this permit, THE FOLLOWING CONDITIONS APPLY TO APPLICATIONS COVERED BY THIS PERMIT.

1. Maximum wind velocities for applications of Restricted Materials unless otherwise covered by the label, law, regulation, other permit conditions or environmental conditions at the application site are:
  - a. Spray - 12 m.p.h.
  - b. Dust - 8 m.p.h.
  - c. Pellets, granular or baits - 16 m.p.h.
2. No pesticide application shall be made or continued when there is the likelihood of contaminating any persons, non-target crops, animals or other public or private property.
3. Unless specifically named as a dust on this permit, NO DUST FORMULATIONS are allowed.
4. Apply pesticides covered by SLN(s) and Section 18(s) in conformance with the SLN(s) and Section 18(s).
5. A flagger is required at the application site for all AIR applications of Zinc Phosphide bait.

Revised 10/90

Q Dicamba & Phenoxy Herbicide CV

CONDITION - Q - DICAMBA AND PHENOXY HERBICIDES - CENTRAL VALLEY/HAZARDOUS AREA

In addition to all applicable laws, regulations and label restrictions, the CONDITIONS CHECKED BELOW APPLY to applications covered by this permit.

1. No ester formulation applications allowed.
2. A smoke column is required at the application site for all Phenoxy and Dicamba applications by aircraft beginning March 16 and continuing through October 15.
3. Do not discharge material more than 10 feet above the crop or target.
4. A drift reducing agent shall be added to the spray mixture at label rates.

5. Maximum wind velocity for Phenoxy herbicides - 10 m.p.h.
6. Maximum wind velocity for Dicamba - 10 m.p.h. EXCEPT when wind is moving in direction of sensitive crops, the maximum wind velocity - 5 m.p.h.
7. No Dicamba application allowed in the vicinity of sensitive crops when the maximum temperature on the day of application is predicted to exceed 85 degrees fahrenheit. Predicted temperature for the following day will be determined by the 3:30 p.m. prediction by the National Weather Station - Stockton Airport.
8. Dicamba applications by aircraft are restricted to a minimum distance of two (2) miles from the following susceptible crops: beans, grapes, sunflower, tomato, safflower, curcubits, potatoes.
9. Dicamba applications by ground are restricted to a minimum distance of 20 feet from the following susceptible crops: beans, safflower, tomato, curcubits, potatoes and 1/4 mile from grapes and sunflowers.
10. No Dicamba or Phenoxy herbicide applications allowed beginning March 16 and continuing through October 15, and until grape leaves in the vicinity of the treated area are "browned off".

I understand that this permit does not relieve me from liability for any damages to any persons or property caused by the use of these pesticides. I waive any claims of liability for damages against the County Department of Agriculture based on the issuance of this permit. I further understand that this permit may be revoked when pesticides are used in conflict with the manufacturer's labeling or in violation of applicable laws, regulations and specific conditions of this permit. I authorize inspection at all reasonable times and whenever an emergency exists by the Department of Pesticide Regulation or the County Department of Agriculture of all areas treated or to be treated, storage facilities for pesticides or emptied containers and equipment used or to be used in the treatment. I have considered alternatives and mitigation measures pursuant to Title 3, California Code of Regulations, section 6426. Taking into account economic, environmental, social, and technological factors, I have adopted those that are feasible and would substantially lessen any significant adverse impact on the environment.

WORKERS SAFETY SERIES ATTACHED

A-1 through A-11 General Information

PERMIT CONDITONS ATTACHED

- B- RM Use Near Schools
- O- Aluminum Phosphide in Rodent Burrows
- P - General
- Q - Dicamba & Phenoxy Herbicides - Central Valley/Hazardous Area
- R - Dicamba & Phenoxy's - Special Hazardous Area
- S - Metam Sodium, Metam Potassium, Dazomet
- T - Aldicarb (Temik)
- U - Endosulfan (Thiodan)
- V - Rice Pesticides Program
  - Attachments 1-5 Thiobencarb (Forms A,B)
- W - Methyl Bromide / Sulfuryl Fluoride
  - Soil within greenhouses
  - Commodity
  - Soil injection
  - Tarped potting soil
  - Single tree site
- X - Furadan chemigation of grapes
- Y - 1, 3 - Dichloropropene
- Z - Other

GROUNDWATER PROTECTION PERMIT CONDITIONS

These conditions apply to pesticides labeled for agricultural, outdoor industrial, or outdoor institutional use that contain chemicals listed in 3CCR section 6800(a): ATRAZINE, SIMAZINE, BROMACIL, DIURON (except products with less than 7% diuron applied to foliage), PROMETON, BENTAZON, AND NORFLURAZON. Ground Water Protection Areas (GWPA), for San Joaquin County, are designated in the Department of Pesticide Regulation document EH03-05. A list of GWPAs may be obtained from the Commissioner's Office or DPR's website ([www.cdpr.ca.gov/docs/gwp](http://www.cdpr.ca.gov/docs/gwp)).

"Engineered rights of way" are defined as areas within a ground water protection area (GWPA) that are constructed in a way that results in increased runoff and collection of storm water, such as railroad ballasts and berms, public roadsides, and highway median strips or similar areas, but not canal or ditch banks or utility lines.

SPECIFIC GROUNDWATER PROTECTION PERMIT CONDITIONS ATTACHED

GWP-C & D Unlined canal and ditch banks

- 1 - Percolation rate is less than or equal to 0.2 inches per hour
- 2 - Applied six months prior to water run
- 3 - All applications are prohibited below high water line

GWP-ROW Engineered rights-of-way within San Joaquin County GWPAs

- 1A - Soil disturbance within 7 days
- 1B - Incorporation
- 1C - Applied between April 1 and July 31
- 2 - Runoff passes through adjacent fully vegetated noncrop area
- 3 - Compliance with NPDES permit
- 4 - Runoff through adjacent area as overland flow

GWP-R Runoff GWPAs within San Joaquin County

- 1 - Soil disturbance
- 2 - Incorporated

HOLDENER RANCHES

Expires: 12/31/2013

- 3 - Band treatment
- 4 - Applied between April 1 and July 31
- 5 - Runoff water held onsite
- 6 - Runoff water stored offsite
- 7 - Runoff to adjacent fallow field

GWP-L Leaching GWPA's within San Joaquin County

- 1 - No irrigation
- 2 - Bed or berm application
- 3 - Managed irrigation

GWP-Director Director Approved Alternative Management Practices or Interim Use

- 1 - Director approved alternative
- 2 - Director approved interim use

Revised 11/11

**P General**

CONDITION - P - General

In addition to all applicable laws, regulations, label restrictions and other more restrictive conditions of this permit, THE FOLLOWING CONDITIONS APPLY TO APPLICATIONS COVERED BY THIS PERMIT.

1. Maximum wind velocities for applications of Restricted Materials unless otherwise covered by the label, law, regulation, other permit conditions or environmental conditions at the application site are:

- a. Spray - 12 m.p.h.
- b. Dust - 8 m.p.h.
- c. Pellets, granular or baits - 16 m.p.h.

2. No pesticide application shall be made or continued when there is the likelihood of contaminating any persons, non-target crops, animals or other public or private property.

3. Unless specifically named as a dust on this permit, NO DUST FORMULATIONS are allowed.

4. Apply pesticides covered by SLN(s) and Section 18(s) in conformance with the SLN(s) and Section 18(s).

5. A flagger is required at the application site for all AIR applications of Zinc Phosphide bait.

Revised 10/90

**Q Dicamba & Phenoxy Herbicide CV**

CONDITION - Q - DICAMBA AND PHENOXY HERBICIDES - CENTRAL VALLEY/HAZARDOUS AREA

In addition to all applicable laws, regulations and label restrictions, the CONDITIONS CHECKED BELOW APPLY to applications covered by this permit.

1. No ester formulation applications allowed.

2. A smoke column is required at the application site for all Phenoxy and Dicamba applications by aircraft beginning March 16 and continuing through October 15.

3. Do not discharge material more than 10 feet above the crop or target.

4. A drift reducing agent shall be added to the spray mixture at label rates.

## HOLDENER RANCHES

Expires: 12/31/2013

5. Maximum wind velocity for Phenoxy herbicides - 10 m.p.h.

6. Maximum wind velocity for Dicamba - 10 m.p.h. EXCEPT when wind is moving in direction of sensitive crops, the maximum wind velocity - 5 m.p.h.

7. No Dicamba application allowed in the vicinity of sensitive crops when the maximum temperature on the day of application is predicted to exceed 85 degrees fahrenheit. Predicted temperature for the following day will be determined by the NOAA - National Weather Service.

8. Dicamba applications by aircraft are restricted to a minimum distance of 2 miles from the following susceptible crops: beans, grapes, sunflower, tomato, safflower, curcurbits, potatoes.

9. Dicamba applications by ground are restricted to a minimum distance of 20 feet from the following susceptible crops: beans, safflower, tomato, curcurbits, potatoes and 1/4 mile from grapes and sunflowers.

10. No Dicamba or Phenoxy herbicide applications allowed beginning March 16 and continuing through October 15, and until grape leaves in the vicinity of the treated area are "browned off".

Revised 10/90

## **O Aluminum & Magnesium Phosphide**

### Use in Rodent Burrow Fumigations

These use conditions are based on a determination by the California Department of Pesticide Regulation that exposure to phosphine fumigants is a risk to public safety.

1. Use is strictly prohibited around all residential areas, including single and multi-family residential properties, nursing homes, schools (except athletic fields where use may continue), day care facilities, and hospitals.
2. The products must only be used outdoors for control of burrowing pests, and are for use only on agricultural areas, orchards, non-crop areas (such as pasture and rangeland), golf courses, athletic fields, parks and recreational areas, cemeteries, airports, rights-of-way, earthen dams, and other non-residential institutional or industrial sites.
3. Products must not be applied in a burrow system that is within 100 feet of a building that is or may be occupied by people or domestic animals. This buffer zone for treatment around non-residential buildings that could be occupied by people or animals has been increased from 15 feet to 100 feet.
4. When this product is used in athletic fields or parks, the applicator must post a sign at entrances to the treated site containing the signal word DANGER/PELIGRO, skull and crossbones, the words: DO NOT ENTER/NO ENTRE, FIELD NOT FOR USE, the name and EPA registration number of the fumigant, and a 24-hour emergency response number. Signs may be removed 2 days after the final treatment.
5. When this product is used out-of-doors in a site frequented by people, other than an athletic field or park, the applicator shall post a sign at the application site containing the signal word DANGER/PELIGRO, skull and crossbones, the name and EPA registration number of the fumigant, and a 24-hour emergency response number. Signs may be removed 2 days after the final treatment.
6. Fumigant Management Plans must be written before all applications of phosphine products, including all burrowing pest fumigations. A Fumigant Management Plan is a written description of the steps designed to plan for a safe, legal and effective fumigation. The certified applicator and owner of the property to be fumigated must characterize the area to be treated and include all safety requirements in the plan before application.

## **B RM Use Near Schools**

### RESTRICTED MATERIALS USE NEAR SCHOOLS

No applications of Restricted Materials shall be made by air or ground within 660 feet of a school in session or when a school sponsored event is in progress. If the pesticide label or regulation requires a larger buffer area, the larger buffer shall apply. There will be no waiver of the required 24 hour Notice of Intent.

These conditions do not apply to the following ground applications:

1. Vertebrate pest control
2. Back-pack applications
3. Equipment where all nozzles are pointing down AND wind direction is periodically measured as moving away from the school site

## 4. Other CAC approved methods

NOTE: The uses of soil fumigants and their corresponding buffer zones are covered by DPR suggested permit conditions or by label.

**SITE CONDITIONS****B RM Use Near Schools****RESTRICTED MATERIALS USE NEAR SCHOOLS**

**Regulatory Notes:**

PQZ PA-3998953

I understand that this permit does not relieve me from liability for any damages to any persons or property caused by the use of these pesticides. I waive any claims of liability for damages against the County Department of Agriculture based on the issuance of this permit. I further understand that this permit may be revoked when pesticides are used in conflict with the manufacturer's labeling or in violation of applicable laws, regulations, and specific conditions of this permit. I authorize inspection at all reasonable times and whenever an emergency exists by the Department of Pesticide Regulation or the County Department of Agriculture of all areas treated or to be treated, storage facilities for pesticides or emptied containers and equipment used or to be used in the treatment. I have considered alternative and mitigation measures pursuant to Title 3, California Code of Regulations, section 6426. Taking into account economic, environmental, social, and technological factors, I have adopted those that are feasible and would substantially lessen any significant adverse impact on the environment.

**GROUNDWATER PROTECTION PERMIT CONDITIONS**

These conditions apply to pesticides labeled for agricultural, outdoor industrial, or outdoor institutional use that contain chemicals listed in 3CCR section 6800(a): ATRAZINE, SIMAZINE, BROMACIL, DIURON (except products with less than 7% diuron applied to foliage), PROMETON, BENTAZON, AND NORFLURAZON. Ground Water Protection Areas (GWPA), for San Joaquin County, are designated in the Department of Pesticide Regulation document EH03-05. A list of GWPAs may be obtained from the Commissioner's Office or DPR's website ([www.cdpr.ca.gov/docs/gwp](http://www.cdpr.ca.gov/docs/gwp)).

"Engineered rights of way" are defined as areas within a ground water protection area (GWPA) that are constructed in a way that results in increased runoff and collection of storm water, such as railroad ballasts and berms, public roadsides, and highway median strips or similar areas, but not canal or ditch banks or utility lines.

**SPECIFIC GROUNDWATER PROTECTION PERMIT CONDITIONS ATTACHED**

**GWP-C & D Unlined canal and ditch banks**

- 1 - Percolation rate is less than or equal to 0.2 inches per hour
- 2 - Applied six months prior to water run
- 3 - All applications are prohibited below high water line

**GWP-ROW Engineered rights-of-way within San Joaquin County GWPAs**

- 1A - Soil disturbance within 7 days
- 1B - Incorporation
- 1C - Applied between April 1 and July 31
- 2 - Runoff passes through adjacent fully vegetated noncrop area
- 3 - Compliance with NPDES permit
- 4 - Runoff through adjacent area as overland flow

HOLDENER RANCHES

Expires: 12/31/2012

GWP-R Runoff GWPA's within San Joaquin County

- 1 - Soil disturbance
- 2 - Incorporated
- 3 - Band treatment
- 4 - Applied between April 1 and July 31
- 5 - Runoff water held onsite
- 6 - Runoff water stored offsite
- 7 - Runoff to adjacent fallow field

GWP-L Leaching GWPA's within San Joaquin County

- 1 - No irrigation
- 2 - Bed or berm application
- 3 - Managed irrigation

GWP-Director Director Approved Alternative Management Practices or Interim Use

- 1 - Director approved alternative
- 2 - Director approved interim use

Revised 11/11

**P General**

CONDITION - P - General

In addition to all applicable laws, regulations, label restrictions and other more restrictive conditions of this permit, THE FOLLOWING CONDITIONS APPLY TO APPLICATIONS COVERED BY THIS PERMIT.

1. Maximum wind velocities for applications of Restricted Materials unless otherwise covered by the label, law, regulation, other permit conditions or environmental conditions at the application site are:
  - a. Spray - 12 m.p.h.
  - b. Dust - 8 m.p.h.
  - c. Pellets, granular or baits - 16 m.p.h.
2. No pesticide application shall be made or continued when there is the likelihood of contaminating any persons, non-target crops, animals or other public or private property.
3. Unless specifically named as a dust on this permit, NO DUST FORMULATIONS are allowed.
4. Apply pesticides covered by SLN(s) and Section 18(s) in conformance with the SLN(s) and Section 18(s).
5. A flagger is required at the application site for all AIR applications of Zinc Phosphide bait.

Revised 10/90

**Q Dicamba & Phenoxy Herbicide CV**

CONDITION - Q - DICAMBA AND PHENOXY HERBICIDES - CENTRAL VALLEY/HAZARDOUS AREA

In addition to all applicable laws, regulations and label restrictions, the CONDITIONS CHECKED BELOW APPLY TO applications covered by this permit.

- 1. No ester formulation applications allowed.
- 2. A smoke column is required at the application site for all Phenoxy and Dicamba applications by aircraft beginning March 16 and continuing through October 15.
- 3. Do not discharge material more than 10 feet above the crop or target.

- 4. A drift reducing agent shall be added to the spray mixture at label rates.
- 5. Maximum wind velocity for Phenoxy herbicides - 10 m.p.h.
- 6. Maximum wind velocity for Dicamba - 10 m.p.h. EXCEPT when wind is moving in direction of sensitive crops, the maximum wind velocity - 5 m.p.h.
- 7. No Dicamba application allowed in the vicinity of sensitive crops when the maximum temperature on the day of application is predicted to exceed 85 degrees fahrenheit. Predicted temperature for the following day will be determined by the NOAA - National Weather Service.
- 8. Dicamba applications by aircraft are restricted to a minimum distance of 2 miles from the following susceptible crops: beans, grapes, sunflower, tomato, safflower, curcurbits, potatoes.
- 9. Dicamba applications by ground are restricted to a minimum distance of 20 feet from the following susceptible crops: beans, safflower, tomato, curcurbits, potatoes and 1/4 mile from grapes and sunflowers.
- 10. No Dicamba or Phenoxy herbicide applications allowed beginning March 16 and continuing through October 15, and until grape leaves in the vicinity of the treated area are "browned off".

Revised 10/90

**O Aluminum & Magnesium Phosphide**

**Use in Rodent Burrow Fumigations**

These use conditions are based on a determination by the California Department of Pesticide Regulation that exposure to phosphine fumigants is a risk to public safety.

1. Use is strictly prohibited around all residential areas, including single and multi-family residential properties, nursing homes, schools (except athletic fields where use may continue), day care facilities, and hospitals.
2. The products must only be used outdoors for control of burrowing pests, and are for use only on agricultural areas, orchards, non-crop areas (such as pasture and rangeland), golf courses, athletic fields, parks and recreational areas, cemeteries, airports, rights-of-way, earthen dams, and other non-residential institutional or industrial sites.
3. Products must not be applied in a burrow system that is within 100 feet of a building that is or may be occupied by people or domestic animals. This buffer zone for treatment around non-residential buildings that could be occupied by people or animals has been increased from 15 feet to 100 feet.
4. When this product is used in athletic fields or parks, the applicator must post a sign at entrances to the treated site containing the signal word DANGER/PELIGRO, skull and crossbones, the words: DO NOT ENTER/NO ENTRE, FIELD NOT FOR USE, the name and EPA registration number of the fumigant, and a 24-hour emergency response number. Signs may be removed 2 days after the final treatment.
5. When this product is used out-of-doors in a site frequented by people, other than an athletic field or park, the applicator shall post a sign at the application site containing the signal word DANGER/PELIGRO, skull and crossbones, the name and EPA registration number of the fumigant, and a 24-hour emergency response number. Signs may be removed 2 days after the final treatment.
6. Fumigant Management Plans must be written before all applications of phosphine products, including all burrowing pest fumigations. A Fumigant Management Plan is a written description of the steps designed to plan for a safe, legal and effective fumigation. The certified applicator and owner of the property to be fumigated must characterize the area to be treated and include all safety requirements in the plan before application.

See end of permit for code descriptions.

I understand that this permit does not relieve me from liability for any damages to any persons or property caused by the use of these pesticides. I waive any claims of liability for damages against the County Department of Agriculture based on the issuance of this permit. I further understand that this permit may be revoked when pesticides are used in conflict with the manufacturer's labeling or in violation of applicable laws, regulations and specific conditions of this permit. I authorize inspection at all reasonable times and whenever an emergency exists by the Department of Pesticide Regulation or the County Department of Agriculture of all areas treated or to be treated, storage facilities for pesticides or emptied containers and equipment used or to be used in the treatment. I have considered alternatives and mitigation measures pursuant to Title 3, California Code of Regulations, section 6426 Taking into account economic, environmental, social, and technological factors, I have adopted those that are feasible and would substantially lessen any significant adverse impact on the environment. **GROUNDWATER PROTECTION PERMIT CONDITIONS**

These conditions apply to pesticides labeled for agricultural, outdoor industrial, or outdoor institutional use that contain chemicals listed in 3CCR section 6900(a): ATRAZINE, SIMAZINE, BROMACIL, DIURON (except products with less than 7% diuron applied to foliage), PROMETON, BENTAZON, AND NORFLURAZON. Ground Water Protection Areas (GWPA), for San Joaquin County, are designated in the Department of Pesticide Regulation document EH03-05. A list of GWPAs may be obtained from the Commissioner's Office or DPR's website ([www.cdpr.ca.gov/docs/gwp/](http://www.cdpr.ca.gov/docs/gwp/)).

"Engineered rights of way" are defined as areas within a ground water protection area (GWPA) that are constructed in a way that result in increased runoff and collection of storm water, such as railroad ballasts and berms, public roadsides, and highway median strips or similar areas, but not canal or ditch banks or utility lines.

**SPECIFIC GROUNDWATER PROTECTION PERMIT CONDITIONS ATTACHED**

## SPECIFIC GROUNDWATER PROTECTION PERMIT CONDITIONS ATTACHED

## GWP-C &amp; D Unlined canal and ditch banks

- 1 - Percolation rate is less than or equal to 0.2 inches per hour
- 2 - Applied six months prior to water run
- 3 - All applications are prohibited below high water line

## GWP-ROW Engineered rights-of-way within San Joaquin County GWPA's

- 1A - Soil disturbance within 7 days
- 1B - Incorporation
- 1C - Applied between April 1 and July 31
- 2 - Runoff passes through adjacent fully vegetated noncrop area
- 3 - Compliance with NPDES permit

## GWP-R Runoff GWPA's within San Joaquin County

- 1 - Soil disturbance
- 2 - Incorporated
- 3 - Band treatment
- 4 - Applied between April 1 and July 31
- 5 - Runoff water held onsite
- 6 - Runoff water stored offsite
- 7 - Runoff to adjacent fallow field

## GWP-L Leaching GWPA's within San Joaquin County

- 1 - No irrigation
- 2 - Bed or berm application
- 3 - Managed irrigation

## GWP-Director Director Approved Alternative Management Practices or Interim Use

- 1 - Director approved alternative
- 2 - Director approved interim use

Revised 10/04

## Aluminum &amp; Magnesium Phosphide

## Use in Rodent Burrow Fumigations

These use conditions are based on a determination by the California Department of Pesticide Regulation that exposure to phosphine fumigants is a risk to public safety.

Use is strictly prohibited around all residential areas, including single and multi-family residential properties, nursing homes, schools (except athletic fields where use may continue), day care facilities, and hospitals.

- \* The products must only be used outdoors for control of burrowing pests, and are for use only on agricultural areas, orchards, non-crop areas (such as pasture and rangeland), golf courses, athletic fields, parks and recreational areas, cemeteries, airports, rights-of-way, earthen dams, and other non-residential institutional or industrial sites.
- \* Products must not be applied in a burrow system that is within 100 feet of a building that is or may be occupied by people or domestic animals. This buffer zone for treatment around non-residential buildings that could be occupied by people or animals has been increased from 15 feet to 100 feet.
- \* When this product is used in athletic fields or parks, the applicator must post a sign at entrances to the treated site containing the signal word DANGER/PELIGRO, skull and crossbones, the words: DO NOT ENTER/NO ENTRE, FIELD NOT FOR USE, the name and EPA registration number of the fumigant, and a 24-hour emergency response number. Signs may be removed 2 days after the final treatment.
- \* When this product is used out-of-doors in a site frequented by people, other than an athletic field or park, the applicator shall post a sign at the application site containing the signal word DANGER/PELIGRO, skull and crossbones, the name and EPA registration number of the fumigant,

and a 24-hour emergency response number. Signs may be removed 2 days after the final treatment. Fumigant Management Plans must be written before all applications of phosphine products, including all burrowing pest fumigations. A Fumigant Management Plan is a written description of the steps designed to plan for a safe, legal and effective fumigation. The certified applicator and owner of the property to be fumigated must characterize the area to be treated and include all safety requirements in the plan before application.

P General

CONDITION - P - General

---

In addition to all applicable laws, regulations, label restrictions and other more restrictive conditions of this permit, THE FOLLOWING CONDITIONS APPLY TO APPLICATIONS COVERED BY THIS PERMIT.

1. Maximum wind velocities for applications of Restricted Materials unless otherwise covered by the label, law, regulation, other permit conditions or environmental conditions at the application site are:
  - a. Spray - 12 m.p.h.
  - b. Dust - 8 m.p.h.
  - c. Pellets, granular or baits - 16 m.p.h.
2. No pesticide application shall be made or continued when there is the likelihood of contaminating any persons, non-target crops, animals or other public or private property.
3. Unless specifically named as a dust on this permit, NO DUST FORMULATIONS are allowed.
4. Apply pesticides covered by SLN(s) and Section 18(s) in conformance with the SLN(s) and Section 18(s).
5. A flagger is required at the application site for all AIR applications of Zinc Phosphide bait.

Revised 10/90

Q Dicamba & Phenoxy Herbicide CV

CONDITION - Q - DICAMBA AND PHENOXY HERBICIDES - CENTRAL VALLEY/HAZARDOUS AREA

---

In addition to all applicable laws, regulations and label restrictions, the CONDITIONS CHECKED BELOW APPLY to applications covered by this permit.

1. No ester formulation applications allowed.
2. A smoke column is required at the application site for all Phenoxy and Dicamba applications by aircraft beginning March 16 and continuing through October 15.
3. Do not discharge material more than 10 feet above the crop or target.
4. A drift reducing agent shall be added to the spray mixture at label rates.
5. Maximum wind velocity for Phenoxy herbicides - 10 m.p.h.
6. Maximum wind velocity for Dicamba - 10 m.p.h. EXCEPT when wind is moving in direction of sensitive crops, the maximum wind velocity - 5 m.p.h.
7. No Dicamba application allowed in the vicinity of sensitive crops when the maximum temperature on the day of application is predicted to exceed 85 degrees fahrenheit. Predicted temperature for the following day will be determined by the 3:30 p.m. prediction by the National Weather Station - Stockton Airport.
8. Dicamba applications by aircraft are restricted to a minimum distance of two (2) miles from the following susceptible crops: beans, grapes, sunflower, tomato, safflower, cucurbits, potatoes.
9. Dicamba applications by ground are restricted to a minimum distance of 20 feet from the following susceptible crops: beans, safflower, tomato, cucurbits, potatoes and 1/4 mile from grapes and sunflowers.
10. No Dicamba or Phenoxy herbicide applications allowed beginning March 16 and continuing through October 15, and until grape leaves in the vicinity of the treated area are "browned off".

See end of permit for  
code descriptions.

I understand that this permit does not relieve me from liability for any damages to any persons or property caused by the use of these pesticides. I waive any claims of liability for damages against the County Department of Agriculture based on the issuance of this permit. I further understand that this permit may be revoked when pesticides are used in conflict with the manufacturer's labeling or in violation of applicable laws, regulations and specific conditions of this permit. I authorize inspection at all reasonable times and whenever an emergency exists by the Department of Pesticide Regulation or the County Department of Agriculture of all areas treated or to be treated, storage facilities for pesticides or emptied containers and equipment used or to be used in the treatment. I have considered alternatives and mitigation measures pursuant to Title 3, California Code of Regulations, section 6426. Taking into account economic, environmental, social, and technological factors, I have adopted those that are feasible and would substantially lessen any significant adverse impact on the environment.

**GROUNDWATER PROTECTION PERMIT CONDITIONS**

These conditions apply to pesticides labeled for agricultural, outdoor industrial, or outdoor institutional use that contain chemicals listed in 3CCR section 6800(a): ATRAZINE, SIMAZINE, BROMACIL, DIURON (except products with less than 7% diuron applied to foliage), PROMETON, BENTAZON, AND NORFLURAZON. Ground Water Protection Areas (GWPA), for San Joaquin County, are designated in the Department of Pesticide Regulation document EH03-05.

A list of GWPA's may be obtained from the Commissioner's Office or DPR's website ([www.cdpr.ca.gov/docs/gwp](http://www.cdpr.ca.gov/docs/gwp)).

"Engineered rights of way" are defined as areas within a ground water protection area (GWPA) that are constructed in a way that results in increased runoff and collection of storm water, such as railroad ballasts and berms, public roadsides, and highway median strips or similar areas, but not canal or ditch banks or utility lines.

#### SPECIFIC GROUNDWATER PROTECTION PERMIT CONDITIONS ATTACHED

##### GWP-C & D Unlined canal and ditch banks

- 1 - Percolation rate is less than or equal to 0.2 inches per hour
- 2 - Applied six months prior to water run
- 3 - All applications are prohibited below high water line

##### GWP-ROW Engineered rights-of-way within San Joaquin County GWPA's

- 1A - Soil disturbance within 7 days
- 1B - Incorporation
- 1C - Applied between April 1 and July 31
- 2 - Runoff passes through adjacent fully vegetated noncrop area
- 3 - Compliance with NPDES permit

##### GWP-R Runoff GWPA's within San Joaquin County

- 1 - Soil disturbance
- 2 - Incorporated
- 3 - Band treatment
- 4 - Applied between April 1 and July 31
- 5 - Runoff water held onsite
- 6 - Runoff water stored offsite
- 7 - Runoff to adjacent fallow field

##### GWP-L Leaching GWPA's within San Joaquin County

- 1 - No irrigation
- 2 - Bed or berm application
- 3 - Managed irrigation

##### GWP-Director Director Approved Alternative Management Practices or Interim Use

- 1 - Director approved alternative
- 2 - Director approved interim use

Revised 10/04

P

General

CONDITION - P - General

In addition to all applicable laws, regulations, label restrictions and other more restrictive conditions of this permit, THE FOLLOWING CONDITIONS APPLY TO APPLICATIONS COVERED BY THIS PERMIT.

1. Maximum wind velocities for applications of Restricted Materials unless otherwise covered by the label, law, regulation, other permit conditions or environmental conditions at the application site are:
  - a. Spray - 12 m.p.h.
  - b. Dust - 8 m.p.h.
  - c. Pellets, granular or baits - 16 m.p.h.
2. No pesticide application shall be made or continued when there is the likelihood of contaminating any persons, non-target crops, animals or other public or private property.
3. Unless specifically named as a dust on this permit, NO DUST FORMULATIONS are allowed.
4. Apply pesticides covered by SLN(s) and Section 18(s) in conformance with the SLN(s) and Section 18(s).
5. A flagger is required at the application site for all AIR applications of Zinc Phosphide bait.

Revised 10/90

Q Dicamba & Phenoxy Herbicide CV

CONDITION - Q - DICAMBA AND PHENOXY HERBICIDES - CENTRAL VALLEY/HAZARDOUS AREA

---

In addition to all applicable laws, regulations and label restrictions, the CONDITIONS CHECKED BELOW APPLY to applications covered by this permit.

- [ X ] 1. No ester formulation applications allowed.
- [ ] 2. A smoke column is required at the application site for all Phenoxy and Dicamba applications by aircraft beginning March 16 and continuing through October 15.
- [ X ] 3. Do not discharge material more than 10 feet above the crop or target.
- [ ] 4. A drift reducing agent shall be added to the spray mixture at label rates.

5. Maximum wind velocity for Phenoxy herbicides - 10 m.p.h.
6. Maximum wind velocity for Dicamba - 10 m.p.h. EXCEPT when wind is moving in direction of sensitive crops, the maximum wind velocity - 5 m.p.h.
7. No Dicamba application allowed in the vicinity of sensitive crops when the maximum temperature on the day of application is predicted to exceed 85 degrees fahrenheit. Predicted temperature for the following day will be determined by the 3:30 p.m. prediction by the National Weather Station - Stockton Airport.
8. Dicamba applications by aircraft are restricted to a minimum distance of two (2) miles from the following susceptible crops: beans, grapes, sunflower, tomato, safflower, curcurbits, potatoes.
9. Dicamba applications by ground are restricted to a minimum distance of 20 feet from the following susceptible crops: beans, safflower, tomato, curcurbits, potatoes and 1/4 mile from grapes and sunflowers.
10. No Dicamba or Phenoxy herbicide applications allowed beginning March 16 and continuing through October 15, and until grape leaves in the vicinity of the treated area are "browned off".

See end of permit for  
code descriptions.

I understand that this permit does not relieve me from liability for any damages to any persons or property caused by the use of these pesticides. I waive any claims of liability for damages against the County Department of Agriculture based on the issuance of this permit. I further understand that this permit may be revoked when pesticides are used in conflict with the manufacturer's labeling or in violation of applicable laws, regulations and specific conditions of this permit. I authorize inspection at all reasonable times and whenever an emergency exists by the Department of Pesticide Regulation or the County Department of Agriculture of all areas treated or to be treated, storage facilities for pesticides or emptied containers and equipment used or to be used in the treatment. I have considered alternatives and mitigation measures pursuant to Title 3, California Code of Regulations, section 6426. Taking into account economic, environmental, social, and technological factors, I have adopted those that are feasible and would substantially lessen any significant adverse impact on the environment.

**GROUNDWATER PROTECTION PERMIT CONDITIONS**

These conditions apply to pesticides labeled for agricultural, outdoor industrial, or outdoor institutional use that contain chemicals listed in 3CCR section 6800(a): ATRAZINE, SIMAZINE, BROMACIL, DIURON (except products with less than 7% diuron applied to foliage), PROMETON, BENTAZON, AND NORFLURAZON. Ground Water Protection Areas (GWPA), for San Joaquin County, are designated in the Department of Pesticide Regulation document EH03-05.

A list of GWPA's may be obtained from the Commissioner's Office or DPR's website  
([www.cdpr.ca.gov/docs/gwp](http://www.cdpr.ca.gov/docs/gwp)).

"Engineered rights of way" are defined as areas within a ground water protection area (GWPA) that are constructed in a way that results in increased runoff and collection of storm water, such as railroad ballasts and berms, public roadsides, and highway median strips or similar areas, but not canal or ditch banks or utility lines.

#### SPECIFIC GROUNDWATER PROTECTION PERMIT CONDITIONS ATTACHED

##### GWP-C & D Unlined canal and ditch banks

- 1 - Percolation rate is less than or equal to 0.2 inches per hour
- 2 - Applied six months prior to water run
- 3 - All applications are prohibited below high water line

##### GWP-ROW Engineered rights-of-way within San Joaquin County GWPA's

- 1A - Soil disturbance within 7 days
- 1B - Incorporation
- 1C - Applied between April 1 and July 31
- 2 - Runoff passes through adjacent fully vegetated noncrop area
- 3 - Compliance with NPDES permit

##### GWP-R Runoff GWPA's within San Joaquin County

- 1 - Soil disturbance
- 2 - Incorporated
- 3 - Band treatment
- 4 - Applied between April 1 and July 31
- 5 - Runoff water held onsite
- 6 - Runoff water stored offsite
- 7 - Runoff to adjacent fallow field

##### GWP-L Leaching GWPA's within San Joaquin County

- 1 - No irrigation
- 2 - Bed or berm application
- 3 - Managed irrigation

##### GWP-Director Director Approved Alternative Management Practices or Interim Use

- 1 - Director approved alternative
- 2 - Director approved interim use

Revised 10/04

P

General

CONDITION - P - General

In addition to all applicable laws, regulations, label restrictions and other more restrictive conditions of this permit, THE FOLLOWING CONDITIONS APPLY TO APPLICATIONS COVERED BY THIS PERMIT.

1. Maximum wind velocities for applications of Restricted Materials unless otherwise covered by the label, law, regulation, other permit conditions or environmental conditions at the application site are:
  - a. Spray - 12 m.p.h.
  - b. Dust - 8 m.p.h.
  - c. Pellets, granular or baits - 16 m.p.h.
2. No pesticide application shall be made or continued when there is the likelihood of contaminating any persons, non-target crops, animals or other public or private property.
3. Unless specifically named as a dust on this permit, NO DUST FORMULATIONS are allowed.
4. Apply pesticides covered by SLN(s) and Section 18(s) in conformance with the SLN(s) and Section 18(s).
5. A flagger is required at the application site for all AIR applications of Zinc Phosphide bait.

Revised 10/90

Q Dicamba & Phenoxy Herbicide CV

CONDITION - Q - DICAMBA AND PHENOXY HERBICIDES - CENTRAL VALLEY/HAZARDOUS AREA

In addition to all applicable laws, regulations and label restrictions, the CONDITIONS CHECKED BELOW APPLY to applications covered by this permit.

1. No ester formulation applications allowed.
2. A smoke column is required at the application site for all Phenoxy and Dicamba applications by aircraft beginning March 16 and continuing through October 15.
3. Do not discharge material more than 10 feet above the crop or target.
4. A drift reducing agent shall be added to the spray mixture at label rates.

- 5. Maximum wind velocity for Phenoxy herbicides - 10 m.p.h.
- 6. Maximum wind velocity for Dicamba - 10 m.p.h. EXCEPT when wind is moving in direction of sensitive crops, the maximum wind velocity - 5 m.p.h.
- 7. No Dicamba application allowed in the vicinity of sensitive crops when the maximum temperature on the day of application is predicted to exceed 85 degrees fahrenheit. Predicted temperature for the following day will be determined by the 3:30 p.m. prediction by the National Weather Station - Stockton Airport.
- 8. Dicamba applications by aircraft are restricted to a minimum distance of two (2) miles from the following susceptible crops: beans, grapes, sunflower, tomato, safflower, curcurbits, potatoes.
- 9. Dicamba applications by ground are restricted to a minimm distance of 20 feet from the following susceptible crops: beans, safflower, tomato, curcurbits, potatoes and 1/4 mile from grapes and sunflowers.
- 10. No Dicamba or Phenoxy herbicide applications allowed beginning March 16 and continuing through October 15, and until grape leaves in the vicinity of the treated area are "browned off".

## GROUNDWATER PROTECTION PERMIT CONDITIONS

These conditions apply to pesticides labeled for agricultural, outdoor industrial, or outdoor institutional use that contain chemicals listed in 3CCR section 6800(a): ATRAZINE, SIMAZINE, BROMACIL, DIURON (except products with less than 7% diuron applied to foliage), PROMETON, BENTAZON, AND NORFLURAZON. Ground Water Protection Areas (GWPA), for San Joaquin County, are designated in the Department of Pesticide Regulation document EH03-05. A list of GWPAs may be obtained from the Commissioner's Office or DPR's website ([www.cdpr.ca.gov/docs/gwp](http://www.cdpr.ca.gov/docs/gwp)).

"Engineered rights of way" are defined as areas within a ground water protection area (GWPA) that are constructed in a way that results in increased runoff and collection of storm water, such as railroad ballasts and berms, public roadsides, and highway median strips or similar areas, but not canal or ditch banks or utility lines.

## SPECIFIC GROUNDWATER PROTECTION PERMIT CONDITIONS ATTACHED

## GWP-C &amp; D Unlined canal and ditch banks

- 1 - Percolation rate is less than or equal to 0.2 inches per hour
- 2 - Applied six months prior to water run
- 3 - All applications are prohibited below high water line

## GWP-ROW Engineered rights-of-way within San Joaquin County GWPAs

- 1A - Soil disturbance within 7 days
- 1B - Incorporation
- 1C - Applied between April 1 and July 31

with adjacent fully vegetated riparian area

3 - Compliance with NPDES permit

GWP-R Runoff GWPA's within San Joaquin County

- 1 - Soil disturbance
- 2 - Incorporated
- 3 - Band treatment
- 4 - Applied between April 1 and July 31
- 5 - Runoff water held onsite
- 6 - Runoff water stored offsite
- 7 - Runoff to adjacent fallow field

GWP-L Leaching GWPA's within San Joaquin County

- 1 - No irrigation
- 2 - Bed or berm application
- 3 - Managed irrigation

GWP-Director Director Approved Alternative Management Practices or Interim Use

- 1 - Director approved alternative
- 2 - Director approved interim use

Revised 10/04

**P General**

CONDITION - P - General

---

In addition to all applicable laws, regulations, label restrictions and other more restrictive conditions of this permit, THE FOLLOWING CONDITIONS APPLY TO APPLICATIONS COVERED BY THIS PERMIT.

1. Maximum wind velocities for applications of Restricted Materials unless otherwise covered by the label, law, regulation, other permit conditions or environmental conditions at the application site are:
  - a. Spray - 12 m.p.h.
  - b. Dust - 8 m.p.h.
  - c. Pellets, granular or baits - 16 m.p.h.
2. No pesticide application shall be made or continued when there is the likelihood of contaminating any persons, non-target crops, animals or other public or private property.
3. Unless specifically named as a dust on this permit, NO DUST FORMULATIONS are allowed.
4. Apply pesticides covered by SLN(s) and Section 18(s) in conformance with the SLN(s) and Section 18(s).
5. A flagger is required at the application site for all AIR applications of Zinc Phosphide bait.

Revised 10/90

**Q Dicamba & Phenoxy Herbicide CV**

CONDITION - Q - DICAMBA AND PHENOXY HERBICIDES - CENTRAL VALLEY/HAZARDOUS AREA

---

In addition to all applicable laws, regulations and label restrictions, the CONDITIONS CHECKED BELOW APPLY to applications covered by this permit.

- 1. No ester formulation applications allowed.
- 2. A smoke column is required at the application site for all Phenoxy and Dicamba applications by aircraft beginning March 16 and continuing through October 15.
- 3. Do not discharge material more than 10 feet above the crop or target.
- 4. A drift reducing agent shall be added to the spray mixture at label rates.
- 5. Maximum wind velocity for Phenoxy herbicides - 10 m.p.h.
- 6. Maximum wind velocity for Dicamba - 10 m.p.h. EXCEPT when wind is moving in direction of sensitive crops, the maximum wind velocity - 5 m.p.h.
- 7. No Dicamba application allowed in the vicinity of sensitive crops when the maximum temperature on the day of application is predicted to exceed 85 degrees fahrenheit. Predicted temperature for the following day will be determined by the 3:30 p.m. prediction by the National Weather Station - Stockton Airport.
- 8. Dicamba applications by aircraft are restricted to a minimum distance of two (2) miles from the following susceptible crops: beans, grapes, sunflower, tomato, safflower, curcurbits, potatoes.
- 9. Dicamba applications by ground are restricted to a minimum distance of 20 feet from the following susceptible crops: beans, safflower, tomato, curcurbits, potatoes and 1/4 mile from grapes and sunflowers.
- 10. No Dicamba or Phenoxy herbicide applications allowed beginning March 16 and continuing through October 15, and until grape leaves in the vicinity of the treated area are "browned off".

See end of permit for code descriptions.

I understand that this permit does not relieve me from liability for any damages to any persons or property caused by the use of these pesticides. I waive any claims of liability for damages against the County Department of Agriculture based on the issuance of this permit. I further understand that this permit may be revoked when pesticides are used in conflict with the manufacturer's labeling or in violation of applicable laws, regulations and specific conditions of this permit. I authorize inspection at all reasonable times and whenever an emergency exists by the Department of Pesticide Regulation or the County Department of Agriculture of all areas treated or to be treated, storage facilities for pesticides or emptied containers and equipment used or to be used in the treatment. I have considered alternatives and mitigation measures pursuant to Title 3, California Code of Regulations, section 6426. Taking into account economic, environmental, social, and technological factors, I have adopted those that are feasible and would substantially lessen any significant adverse impact on the environment.

**P General**

CONDITION - P - General

In addition to all applicable laws, regulations, label restrictions and other more restrictive conditions of this permit, THE FOLLOWING CONDITIONS APPLY TO APPLICATIONS COVERED BY THIS PERMIT.

1. Maximum wind velocities for applications of Restricted Materials unless otherwise covered by the label, law, regulation, other permit conditions or environmental conditions at the application site are:
  - a. Spray - 12 m.p.h.
  - b. Dust - 8 m.p.h.
  - c. Pellets, granular or baits - 16 m.p.h.

- c. Pellets, granular or baits - 16 m.p.h.
2. No pesticide application shall be made or continued when there is the likelihood of contaminating any persons, non-target crops, animals or other public or private property.
  3. Unless specifically named as a dust on this permit, NO DUST FORMULATIONS are allowed.
  4. Apply pesticides covered by SLN(s) and Section 18(s) in conformance with the SLN(s) and Section 18(s).
  5. A flagger is required at the application site for all AIR applications of Zinc Phosphide bait.

Revised 10/90

**Q Dicamba & Phenoxy Herbicide CV**

**CONDITION - Q - DICAMBA AND PHENOXY HERBICIDES - CENTRAL VALLEY/HAZARDOUS AREA**

In addition to all applicable laws, regulations and label restrictions, the CONDITIONS CHECKED BELOW APPLY to applications covered by this permit.

- 1. No ester formulation applications allowed.
- 2. A smoke column is required at the application site for all Phenoxy and Dicamba applications by aircraft beginning March 16 and continuing through October 15.
- 3. Do not discharge material more than 10 feet above the crop or target.
- 4. A drift reducing agent shall be added to the spray mixture at label rates.
- 5. Maximum wind velocity for Phenoxy herbicides - 10 m.p.h.
- 6. Maximum wind velocity for Dicamba - 10 m.p.h. EXCEPT when wind is moving in direction of sensitive crops, the maximum wind velocity - 5 m.p.h.
- 7. No Dicamba application allowed in the vicinity of sensitive crops when the maximum temperature on the day of application is predicted to exceed 85 degrees fahrenheit. Predicted temperature for the following day will be determined by the 3:30 p.m. prediction by the National Weather Station - Stockton Airport.
- 8. Dicamba applications by aircraft are restricted to a minimum distance of two (2) miles from the following susceptible crops: beans, grapes, sunflower, tomato, safflower, curcurbits, potatoes.
- 9. Dicamba applications by ground are restricted to a minimum distance of 20 feet from the following susceptible crops: beans, safflower, tomato, curcurbits, potatoes and 1/4 mile from grapes and sunflowers.

potatoes and 1/4 mile from grapes and sunflowers.

- [ ] 10. No Dicamba or Phenoxy herbicide applications allowed beginning March 16 and continuing through October 15, and until grape leaves in the vicinity of the treated area are "browned off".

REPORT OF WE

ND GAS  
ANDONMENT

Woodland, California

August 11, 1960

Mr. R. W. Anderson  
1831 Truxtun Avenue  
Bakersfield, California  
Agent for RICHARD S. RHEM, OPERATOR

DEAR SIR:

077 02337

Your report of abandonment of Well No. "Weaver-Cordes" 1  
Sec. 26, T. 2 S., R. 4 E., M.D. B. & M., \_\_\_\_\_ field,  
San Joaquin County, dated July 28, 1960, has been  
examined in conjunction with records filed in this office.

A review of the reports and records shows that the requirements of this Division, which  
are based on all information filed with it, have been fulfilled.

RE: Rheem - Cordes, Brown Lease  
Our File No. 789

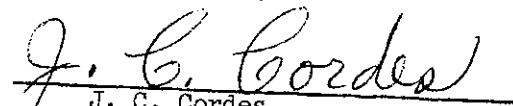

Gentlemen:

Our attorneys, Chadeayne & Wilkinson have advised us the contents of your letter of September 23, 1959 directed to them, concerning the conversion of Richard S. Rheem, Operator well No. "Weaver-Cordes" 1, Sec. 26, T. 2 S., R. 4 E., M. D. B. & M., San Joaquin County, for the purpose of a fresh water well.

Pursuant to that letter, this is to request that the placing of the ten foot surface plug be eliminated in the handling or abandonment of this well.

We would also advise you that we will, from date of abandonment thereof by Rheem and upon compliance by them of the terms and provisions of this lease, concerning such abandonment, assume full, complete and final responsibility for the well, and all matters in connection therewith.

Very truly yours,

  
J. C. Cordes

  
Mabel Cordes

RE: Oil and Gas Lease  
Cordes & Brown  
Our File No. 789

Dear Mr. Kasline:

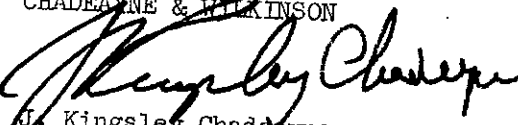

We represent J. C. Cordes, Mabel Cordes, his wife and Mary M. Brown, lessors under certain leases covering Sections 27 and 26, Township 2 South, Range 4 East, M.D.B.&M. in San Joaquin County, leased December 31st, 1958 to Richard S. Rheem as lessee.

The lease provides, in paragraph 27 thereof, that upon abandonment of any well, the lessor shall have the right to request the casing be left therein, so that he may use same for purposes of a water well, provided that the amount of casing left, shall comply with the laws of the State of California, and the rules and regulations of any agencies thereof having jurisdiction of the matter.

Lessee has, during the last six weeks, been drilling a well on the leased premises and lessors are advised that the well is to be abandoned. It is the intention of lessors to exercise their option under paragraph 27 of said lease, as to said abandoned well, and they have been advised by Mr. James R. Weddle, oil and gas engineer of the Department of Natural Resources, that we should address this letter to you on their behalf, advising you of lessors intention to exercise said option and to use said well as a water well, and we would appreciate it if you would advise us anything necessary to comply with the regulations of your department.

Very truly yours,

CHADEAYNE & WILKINSON

  
J. Kingsley Chadeayne

Mr. R. W. Anderson  
1831 Truxtun Ave.  
Bakersfield, California  
Agent for RICHARD S. BHEEM, OPERATOR

Woodland, Calif.  
October 2, 1959

DEAR SIR:

Operations at well No. "Weaver-Cordes" 1, Sec. 26, T. 2 S, R. 4 E, M.D. B & M.  
Field, in San Joaquin County, were witnessed  
on September 21, 1959 Mr. J. R. Weddle, representative of the supervisor was present  
from 1:30 P.M. to 2:45 P.M. There were also present R. Anderson, Engineer and  
G. Sheehan, Drilling Foreman  
Present condition of well: 10 3/4" ann. 1092', T.D. 8222', plugged with cement 1112'-996'.

The operations were performed for the purpose of witnessing the location and hardness of a cement  
plug placed from 1112' to 996' in the process of abandonment.  
Mr. Sheehan reported:

1. An 8 3/4" hole was drilled from 1096' to 8222'.
2. On September 21, 1959, 70 sacks of cement was pumped into the hole through drill pipe hanging at 1112'.

THE ENGINEER NOTED the cement plug at the reported depth of 9996' supported all of the weight of the drill pipe.

THE LOCATION AND HARDNESS OF THE CEMENT PLUG AT THE REPORTED DEPTH OF 996' ARE APPROVED.

1831 Truxtun Ave.  
Bakersfield, California  
Agent for RICHARD S. RHEEM, OPERATORWoodland, Calif.  
October 2, 1959

DEAR SIR:

Your \_\_\_\_\_ proposal to abandon Well No. "Weaver-Cordes" 1,  
Section 26, T. 2 S, R. 4 E, M.D.B. & M., \_\_\_\_\_ Field, San Joaquin County,  
dated Sept. 28, 1959, received Sept. 30, 1959, has been examined in conjunction with records filed in this office.

Present conditions as shown by the records and the proposal are as follows:

## THE NOTICE STATES:

## "THE PRESENT CONDITION OF THE WELL IS:

1. Total Depth: 8222'
  2. Complete casing record, including plugs:
    1. 10-3/4" 32# casing cemented at 1092' in 15-1/2" hole with 585 sacks premixed with 4% gel.
    2. 8-3/4" hole drilled to 8222'.
    3. Induction-Electric log indicated no gas sands present.
  3. Last Produced Never produced.
- Additional Data for Dry Hole
4. Oil or Gas showings and results of tests:  
Test of interval 6725-6746' resulted in recovery of 1900' of 630 g/g salt water.
  5. Geologic age at bottom: Crataceous
  6. Base of fresh water sands: Above shoe of surface casing at 830'."

## PROPOSAL:

## "THE PROPOSED WORK IS

1. Fill hole with heavy mud.
2. Hang drill pipe at 1112' and pump in and equalize 70 sacks of cement. Your Division to witness and approve location and hardness of top of plug above 1070'.
3. Turn well over to landowner, Mr. J. C. Cordes, 266 Hollywood Ave., Tracy, Calif., for conversion to water well."

## DECISION:

THE PROPOSAL IS APPROVED PROVIDED THAT THE WELL SHALL BE SECURELY CAPPED AT THE SURFACE PENDING CONVERSION TO A WATER WELL.

Note: Location of well is 1320' N., 200' E. fr. S.W. cor. of Sec. 26.  
Name of Landowner: Mr. J. C. Cordes, 266 Hollywood Ave., Tracy, California

Woodland, Calif.  
August 12, 1959

DEAR SIR:

Operations at well No. "Weaver-Cordes" 1, Sec. 26, T. 2 S, R. 4 E, M.D. B & M.  
Field, in San Joaquin County, were witnessed  
on August 11, 1959, Mr. Donald D. Bruce, representative of the supervisor was present  
from 6:30 P.M. to 7:00 P.M.. There were also present E. Robbins, Geologist and  
E. McGun, Driller  
Present condition of well: 10 3/4" cas. 1092'. T.D. 2960' (drilling)

The operations were performed for the purpose of inspecting the blow-out prevention equipment.

Mr. Robbins reported:

1. On August 7, 1959, the 10 3/4" - 32.75 lb. surface casing was cemented at 1092' in a 15 1/2" hole with 585 sacks of cement premixed with 4% Gel. Cement returned to surface.
2. An 8 3/4" hole was being drilled ahead at 2960'.

THE ENGINEER NOTED that the well was equipped with blow-out prevention equipment to close in the well with the drill pipe either in or out of the hole.

THE BLOW-OUT PREVENTION EQUIPMENT AND INSTALLATION ARE APPROVED.

SW/4 of Sec. 26

Do mineral and surface leases coincide? Yes x  
Location of Well: 1320 feet North along section line and 200 feet East at right angles to said line from the South West corner of section 26  
Elevation of ground above sea level 160 feet USGS datum.  
All depth measurements taken from top of K E which is 12 feet above ground."

**PROPOSAL:**

Size of Casing Inches A.F.I.	Weight	PROPOSED CASING PROGRAM		Cementing Depth
		Grade and Type	Top Bottom	
<u>10-3/4</u>	<u>32</u>	<u>K-40</u>	<u>0</u> <u>700'</u>	<u>700'</u>
<u>5-1/2</u>	<u>15 &amp; 17</u>	<u>J-55</u>	<u>0</u> <u>8500+</u>	<u>8500'</u>
Intended zone or zones of completion:		<u>Cretaceous sands</u>	<u>Various</u>	
		(Name)	(Depth, top and bottom)	

Estimated total depth 8500'

It is understood that if changes in this plan become necessary we are to notify you before running casing."

**DECISION:**

THE PROPOSAL IS APPROVED PROVIDED THAT:

1. The 10 3/4" surface casing shall be cemented with sufficient cement to fill behind this casing from the shoe to the ground surface.
2. Mud fluid of sufficient weight and proper consistency to prevent blow-outs shall be used in drilling, and the column of mud fluid shall be maintained to the surface at all times, particularly while pulling the drill pipe.
3. Adequate blow-out prevention equipment shall be provided and kept ready for operation at all times.
4. In the event the 5 1/2" casing is cemented in the hole, fresh waters, if present below the 10 3/4" surface casing, shall be protected by cement behind the casing.
5. This Division shall be notified:
  - a. To inspect blow-out prevention equipment prior to drilling below a depth of 1500'.
  - b. To witness a test of each possible water shut-off.

**Notice of Intention to Abandon Well**

This notice must be given at least five days before work is to begin; one copy only

BAKERSEFIELD Calif. SEPT. 28, 19 59

DIVISION OF OIL AND GAS

In compliance with Division 3, Public Resources Code, notice is hereby given that it is our intention to abandon Well No. "WEAVER-CORDES" 1, Sec. 26, T. 2S,

R. 4E, B. & M., --- Field, SAN JOAQUIN County,

commencing work on SEPT. 21 19 59.

THE PRESENT CONDITION OF THE WELL IS:

1. Total Depth: 8222'
2. Complete casing record, including plugs:
  1. 10-3/4" 32# CASING CEMENTED AT 1092' IN 15-1/2" HOLE WITH 585 SACKS PREMIXED WITH 4% GEL.
  2. 8-3/4" HOLE DRILLED TO 8222'.
  3. INDUCTION-ELECTRIC LOG INDICATED NO GAS SANDS PRESENT.
3. Last Produced NEVER PRODUCED.  
(Date) (Oil, B/D) (Water, B/D)

ADDITIONAL DATA FOR DRY HOLE

4. Oil or Gas showings and results of tests:  
TEST OF INTERVAL 6725-6746' RESULTED IN RECOVERY OF 1900' OF 630 G/G SALT WATER.
5. Stratigraphic markers and depths:
6. Geologic age at bottom: CRETACEOUS
7. Base of fresh water sands: ABOVE SHOE OF SURFACE CASING AT 830'.

THE PROPOSED WORK IS

1. FILL HOLE WITH HEAVY MUD.
2. HANG DRILL PIPE AT 1112' AND PUMP IN AND EQUALIZE 70 SACKS OF CEMENT. YOUR DIVISION TO WITNESS AND APPROVE LOCATION AND HARDNESS OF TOP OF PLUG ABOVE 1070'.
3. TURN WELL OVER TO LANDOWNER, MR. J. C. CORDES, 266 HOLLYWOOD AVE., TRACY, CALIF., FOR CONVERSION TO WATER WELL.
